

Technology Coordinator
Report to the Pittsville School District Board of Education
Monday, March 8, 2021

New Tech Director – Michael is planning to start April 19 and will job shadow me until my retirement.

Phone System Upgrade – Proposals are in and over the next couple weeks I have scheduled virtual meetings with each vendor to go over their proposals. Will have a recommendation for the board for the April board meeting.

CTE Related Projects – I have a meeting this Friday with technicians from RMM Solutions to go over updates on requirements for cabling and network installation in the CTE addition. There have been many changes since our 1st request for proposal as part of the E-rate application process over a year ago. Changes will affect the bottom line, but these changes were expected and the dollar amounts should be minimal.

Chromebook Upgrades – An order has been placed with TRA for 150 replacement Chromebooks as part of our summer upgrade plans. Orders were placed now to avoid the manufacturing and shipping delays associated with the COVID19 crisis. Delivery is expected in late April.
